What is meerMINT?

meerMINT is a project for young people between 10 and 16 years to experience and investigate STEM (Science, Technology, Engineering and Mathematics) in Bremen and Bremerhaven. Together we want to tinker, rack our brains, puzzle, experiment, program, research, and try out. We show you where STEM plays a role in everyday life and together we find out what fascinating and exciting things we can do and experience with STEM.

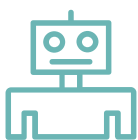

Who can participate?

All interested children and young people.

Important: All activities are free of charge.

Adults are welcome as supporters in all Docks. We are always looking for interested and active people who wants to share their STEM knowledge and have new ideas for activities.

Do I need any prior knowledge?

The most important thing is that you are curious and like to experiment, research or tinker with us. Any special prior knowledge is not necessary.

And if you have any questions please ask us and together we will look for answers.

Where and how can I participate?

At two locations in the state of Bremen, the so called meerMINT Docks, we offer various activities for different age groups. There are individual events on specific topics, regular meetings and always new workshops and holiday offers.
